INDEX INSTITUTE OF PHARMACY

Activity Report of Hospital Visits

INTRODUCTION

The report is based on a visit to a big 1200 bedded hospital in our campus called "Index Medical College, Hospital & Research Center". This visit was conducted by our Institute for the students who are studying in Pharmacy, to make them aware about how the equipments of the hospital, works and why those equipments are important.

HIGHLIGHTS OF THE VISIT

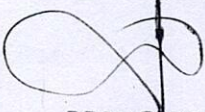

As we entered into the hospital, innumerable number of people was involving in varied activities. There was a person chosen from the management of the hospital to give information to us about the treatment they give in the hospital. Then he took us to the laboratory of the hospital and showed us some laboratory equipment that they use to do various experiments. After that he took us to the dialysis room where dialysis patients get their treatment. When we saw them we were very emotional because of the hard time they going through. Then we all went to the cardio center where they treat people with heart related problems. We were mesmerized after seeing the huge machines they use in there.

Finally, we went to the Intensive Care Unit (ICU), where they treat people in critical condition but we were not allowed to go inside that place.

The whole trip was mostly based on seeing the doctors in action and the doctors giving us talks about their career. They even showed how to talk to patients and how to conduct some tests.

The trip was over all exciting. But the most exciting and the highlight of the trip were getting to watch a doctor in action. The doctor was doing a surgery of a heart and for biology students it benefits a lot.

During our visit, we saw many doctors and nurses rushing through the lobby to get to patients rooms and to do their other duties. We waited in the lobby where we met an expert doctor who was our guide. He was friendly and had rich knowledge about many areas in the medical field. We were able to see doctors and nurses working together and using high-tech medical equipment

to treat patients as well as experience how they use said machines. We were also given information and advice on how to deal with patients with different backgrounds, illnesses etc.

SUGGESTIONS AND RECCOMENDATIONS

Even though the whole trip helped the students, the time give for the trip is too limited and short. Some of the students were unable to take notes and understand also.

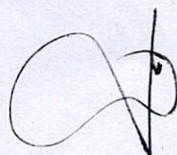

So all of the student's reccomend to exceed the time limit given for the student for the next year.

CONCLUSION

In conclusion, the overall visit was helpful. A student says "I get scared whenever I am in a hospital, but this trip helped me to overcome it".the visit was helpful to learn practical aspect of hospital pharmacy.

INDEX INSTITUTE OF PHARMACY
ACTIVITY REPORT
of
HEALTH CARE CENTER VISIT

INTRODUCTION

The report is based on a visit to a Rural Centre of huge 1200 bedded hospital . This visit was conducted by our Institute for the students who are studying Pharmacy I year, to make them aware about how the hospital works in rural areas.

HIGHLIGHTS OF THE VISIT

First and foremost we were given a tour of the large medical facility and a demonstration of the medical equipments. After which we were allowed to follow selected doctors of throughout their daily medical tasks such as surgeries and checkups. We are granted the opportunity to see these heroes in action as doctors and nurses worked together to offer help and relief to the patients.

Secondly we were given a briefing by a 2 doctors. The doctors took great care in weighting the pros and cons of a life in this sector.

CONCLUSION AND RECOMMENDATION

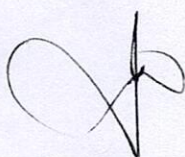

In a nutshell this visit was helpful and fruitful. However the time given for us was limited therefore the trip was hasty. Therefore it is the suggestions of students to make this a full day visit rather than a half day.

CONCLUSION

- All in all, the trip was very informative and enjoyable.
All things considered the visit was really useful.
- got insight into the important medical things.
